New and exclusive for Valentine`s!

This year, Sierra would like to offer you a great opportunity to market some brand new varieties of spray roses for Valentine's Day. Denmar, one of the world's leading spray rose producers, has given us exclusivity to sell these new varieties into our marketplace before making them available to the mass market. New vibrant colors, excellent vase life and larger bloom size are just some of the characteristics of these newer generation spray roses. Quantities are limited so please contact your sales person as soon as possible for more information.
